Laying Open Date : March 24, 1989

Application No. : S63-81308

Application Date : April 4, 1988

Applicant : Kobayashi Kose Co.

Claim:

1. An oily makeup cosmetic composition, wherein a silicone gel composition and powder used for cosmetic are dispersed in an oily base comprising a semi-solid oil or a liquid oil and an oily solid material, and/or an oily gelatinizing agent, said silicone gel composition comprising
 - (a) a silicone polymer having a crosslinked three dimensional structure to be capable of containing its own weight or more of benzene, said silicone polymer being insoluble in benzene, and
 - (b) a silicone oil having a low viscosity.

As the semi-solid oil or the liquid oil, any one which is usually used in cosmetic compositions can be used such as mineral oils, ... and higher alcohols. Examples include liquid paraffin, ... and oleyl alcohol.

As the solid wax, any one allowed to be used for cosmetic compositions with a melting point of 40°C or higher can be used such as hydrocarbons, wax, ... and higher alcohols. Examples include paraffin wax, ... polyethylene wax, ... and lauryl alcohol.

As the oily gelatinizing agent, any known gelatinizing agent in the cosmetic industry can be used, for example, clay minerals such as organically modified montmorillonite clay; ... ; metallic soap such as aluminum 12-hydroxystearate... .
